

Exploratory Testing with Rainforest QA

Every bug counts. Rainforest Exploratory provides fast, scalable exploratory testing without the stress and investment required to manage an in-house exploratory testing team.

Manually testing is time-consuming and expensive, especially for mobile devices. Rainforest lets you test across multiple devices and browsers in parallel for fast, comprehensive feedback. Offload time-intensive, tedious manual QA work to Rainforest and free up your QA team for high-level quality assurance tasks and exploratory tests.

Meet Your On-Demand Exploratory Team

The best of the best are available to help QA your application. Our Exploratory testers represent the top 1% of our community and are experts in their field.

- Dedicated testers are on-call to dig into your application, with results in just 48-hours
- Give a little instruction, or a lot -- testers go as broad or granular as you need

Discover Bugs Before Your Customers Do

Our tester network is available 24/7 for on-demand QA testing, so you can get test results in a matter of hours whether you need them at 3pm or 3am.

- Cross-browser, cross-device exploratory testing for quality assurance that doesn't take time away from your team
- On-demand testing environments for the browsers and mobile devices you need most

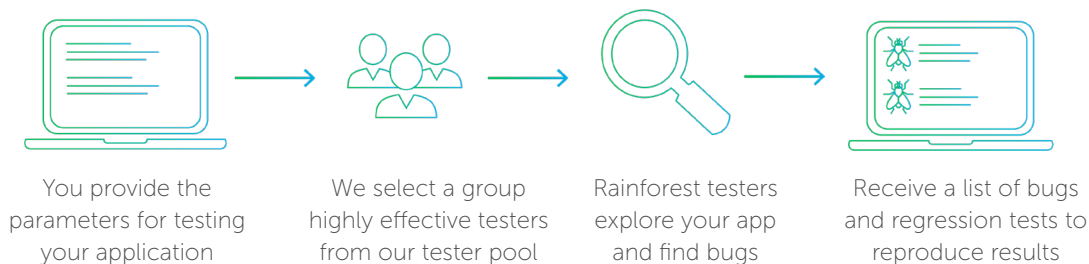

Build Coverage and Ship with Confidence

Whether you're building your regression suite for a new feature or fortifying coverage for your existing ones, Rainforest Exploratory testing provides you with real feedback to help you understand where you need coverage most.

- Find weaknesses and issues that matter most
- Easily integrate regression reports into Rainforest test suite

How Rainforest Exploratory Works

We dedicate the same skilled and experienced testing team to your application for every session. You provide the testing parameters and testing infrastructure, then they'll explore your application. Testers provide comprehensive results including video of their session and a detailed log of any issues they encounter.

"Rainforest Exploratory lets us gather quick feedback on areas for which we didn't have the bandwidth to do a lot of manual testing before."

Brian Goodman
Product Manager, Poll Everywhere

Rainforest Exploratory Features

- ✓ On-Demand Testing Environments
- ✓ Skilled Exploratory Testers
- ✓ Comprehensive Issue Reports
- ✓ Cross-Platform Test Execution
- ✓ Flexible Testing Parameters
- ✓ Integrates into Rainforest Platform

About Rainforest QA

Rainforest QA helps agile and continuous delivery engineering teams move faster with the industry's only AI-powered crowdttesting platform. Our platform leverages 60,000 qualified testers to deliver on-demand, comprehensive and machine learning-verified regression test results. Rainforest customers spend less time and money testing so they can ship better applications faster. For more information on Rainforest, visit <https://www.rainforestqa.com>.
