

DATA SHEET

Mobile App Testing with Rainforest QA

Don't let device fragmentation hold you back. Rainforest offers mobile app testing on real devices and virtual machines for fast results at scale.

Manually testing is time-consuming and expensive, especially for mobile devices. Rainforest lets you test across multiple devices and browsers in parallel for fast, comprehensive feedback. Offload time-intensive, tedious manual QA work to Rainforest and free up your QA team for high-level quality assurance tasks and exploratory tests.

Scalable Mobile App Testing

60K crowdsourced QA testers with mobile devices via Amazon Device Farm for scalable mobile testing without the device maintenance.

- Test instantly across Android and iOS VMs for feedback in 30 minutes
- Get real-world results on Amazon Device Farm real devices
- Access 60,000 trained QA testers for a testing network that scales with you

On-Demand Execution, Fast Results

Our tester network is available 24/7 for on-demand QA testing, so you can get test results in 30 minutes whether you need them at 3pm or 3am.

- Global testing network that's always on -- no timezones or office hours to worry about
- Clean, deterministic results to easily pinpoint bugs

Mobile Testing Within Your Workflow

Rainforest Mobile integrates mobile testing into developer workflows seamlessly for easier testing and faster feedback.

- Write, manage and run tests from command line
- Integrate test runs and results into CI servers, bug tracking tools and more

How Rainforest for Mobile Apps Works

Rainforest leverages a large network of crowdsourced testers, virtual machines (VMs), and Amazon Device Farm to execute tests quickly, enabling you to easily run functional tests and regression tests on mobile platforms without the headache of managing a team of testers and physical phones, or a suite of automated tests.

"Any Rainforest test case that we write becomes extremely efficient over time. We're saving 25-30% of our QA time by leveraging Rainforest."

Dominic Esposito
Head of Product, Jitjatjo

Rainforest Mobile Features

- ✓ Fast, secure mobile VM environments
- ✓ On-demand access to crowd of 60K testers
- ✓ Results backed by AI
- ✓ Real Devices via Amazon Device Farm
- ✓ Video and screenshot test results
- ✓ Integration into CI and Bug Tracking Tools
- ✓ HTTP, browser and app Logs
- ✓ Geolocation testing
- ✓ Full-featured API

About Rainforest QA

Rainforest QA helps agile and continuous delivery engineering teams move faster with the industry's only AI-powered crowdtesting platform. Our platform leverages 60,000 qualified testers to deliver on-demand, comprehensive and machine learning-verified regression test results. Rainforest customers spend less time and money testing so they can ship better applications faster. For more information on Rainforest, visit <https://www.rainforestqa.com>.
