Rainforest Reporting

Accurate measurement is the first step towards optimizing quality. But QA processes don't always provide the metrics that help teams understand what's working and what's not.

With Rainforest's Reporting dashboard, your team can gain visibility into test suite performance and effectively measure the results of your QA process, giving you more confidence in product quality and the insights you need to make data-driven decisions.

Track account usage

Get at-a-glance insights into how much you're using Rainforest.

Monitor test performance

Gain high-level insights into the health and performance of your test suite from an easy-to-read dashboard.

Optimize Your QA Process

Collaborate confidently

Whether you have a QA team of 1 or 100, stay confident that your QA process is yielding results with high-level insight into testing activity.

Discover quality trends

Tracking results and usage over time allows you to gain insight into how your QA process is performing over time and identify issues proactively.

Keep your team informed

QA shouldn't be a black box; give every stakeholder an overview of how your investment in QA processes is improving product quality.

Gain Deeper Quality Insights

Drill down on test results

Break down test results to get the insights you need to understand performance. View test results by run group, feature and environment for clearer insight into where your team should focus for the greatest impact.

Track test case management

Monitor how many tests are created, and how frequently they are updated to ensure that flaky tests don't drag down performance.

Understand how responsive your team is with failure engagement tracking.

Quantify QA process improvements

Your QA process impacts everything from delivery time to customer NPS. Keep track of product quality and QA process performance over time, and gain the insights you need to map QA efforts to business goals.

About Rainforest QA

Rainforest is changing the way QA is done in an era of continuous delivery. Our on-demand QA solution improves the customer experience by enabling development teams to discover significantly more problems before code hits production. Hundreds of companies including Adobe, Oracle and Solarwinds use Rainforest to automate their QA testing process and easily integrate it with their development workflow via a simple API. Headquartered in San Francisco, Rainforest is a 2012 Y Combinator graduate funded by Bessemer Venture Partners and SVB Capital among others. For more information, visit <https://www.rainforestqa.com>.
